FEATURED EQUIPMENT 3

WHO'S THAT? 4

THE BOTTOM 4 LINE! 4

Summer's here, and the time is right, for dancing in the streets!

OK, so I'm dating myself, but thankfully the tune was already a few years old when I heard it. And, if you don't know what I'm talking about, just put that headset back on and crank up some MCR or Disturbed!

Amitron has a brand new AOI system!

?

Who is featured this month...

NEED TO DISIPATE MORE THAN SUMMER HEAT? ASK US ABOUT T-LAM FROM LAIRD TECHNOLOGIES!

Meet our new Camtek Orion 868

With hundreds of systems installed worldwide, the Orion is a well established, Inspectify™ based, Automated Optical Inspection (AOI) system. Designed for fine-line PCB manufacturers with panels down to 12.5μ line-space technology, the new Orion 868 FL is equipped with advanced-technology innovations while taking advantage of the Orion series accumulated, field-proven experience. The PCB industry continues to advance with denser technology and low contrast materials, making the AOI process even more crucial

Equipped with enhanced optics and advanced detection tools the Orion 868 FL meets the industry's highest standards, ensuring an accurate and successful AOI process.

WHO'S THAT?

This smiling face is Amitron's very own Cathy Becker. I've had the pleasure of knowing Cathy for the past 24 years. I'm also proud of the fact that as serious and dedicated as she is to her job... I can still make her laugh! (at least up til now!)

cbecker@amitroncorp.com**CATHY BECKER**

- Cathy watching prices like a hawk.... pennies!
- A sales rep gives away some tooling for a job... Cathy exclaims "who's paying for this"..... Hundreds!
- The look on Cathy's face when she returns from vacation and sees her picture here...

PRICELESS!

Cathy has been with Amitron since 1994, and in the circuit board industry for over 30 years. As the Sales Coordinator, Cathy oversees the customer service and quoting functions, and makes sure that the customers have what they need, when they need it. I don't know what we'd do without her!

Amitron Corporation is one of the largest, privately-held circuit board manufacturers in the United States. Together with our international affiliates, we can offer the very best sourcing options for all your circuit board requirements. Everything from proto-types to high volume production, and boards from 1 to 20 layers.

One stop shopping for all your circuit board requirements!

ISO-9001 / 2000

INDIVIDUALITY

ALWAYS REMEMBER THAT YOU ARE UNIQUE. JUST LIKE EVERYBODY ELSE.

WHAT'S THE BOTTOM LINE?

This year started out, and continues to be, a strong year, despite high gas prices and talk of recession. Sure, there's the summer lull due to vacations, but don't sweat too much. Fall will be here in no time, followed by another... dare I say it... WINTER.

In the meantime, enjoy your summer, whether it's on a golf course, a lake, or just stretched out in that back yard hammock!

Thanks,
Tom Massman
